ADDITIONS AND CORRECTIONS

DOI 10.1095/biolreprod.106.056572

The legend for Figure 1 from the above-referenced paper inadvertently omitted reference to the original publication of this figure. The corrected figure legend appears below.
FIG. 1. Calcium oscillation in a representative porcine oocyte incubated in the presence of 200 µM thimerosal. Originally published in Wang et al., Zygote 1999 (reprinted with permission).

DOI 10.1095/biolreprod.106.056069

The legend for Figure 3 from the above-referenced paper included panels also published in these authors’ companion paper (McLean et al. Biol Reprod August 2006 75:167–175, published online ahead of print 29 March 2006; DOI 10.1095/biolreprod.105.049817). The corrected legend appears below.
FIG. 3. Photomicrographs of 1-, 2-, 4-, and 8-wk-old bull testis donor tissue: 1-wk donor tissue (A); 2-wk donor tissue (B); 4-wk donor tissue (C); 8-wk donor tissue (D). Seminiferous tubule cross sections of all donor ages contain Sertoli cells and gonocytes (arrows). Bar = 50 µm. Panels C and D of this figure appear in Schmidt et al. Biol Reprod 2006 (in this issue).
